

## 2 Plus 1 banknote sorting machine with fitness 8301

High speed desktop banknote sorter, handles large values of dual side serial number recognition, enhance your daily cash handing .Fitness function help you sorting defective money and conterfeit money. Due to keep your property safe.

## Features:

1. Double Japan brand CIS sensor, MG, IR, UV, thickness counterfeit detection.
2. Accurate image, serial number recognition, full-scale fluorescent graphic recognition.
3. Support multi-currency mix: RMB USD EUR GBP JPY etc, up to 39
4. Sorting modes old and new /denomination sorting/version sorting/face sorting/counting/Mixed mode/ Batch mode
5. Efficient, stable, innate virus immunity operating system.
6. Three-stage modular fully-opened banknote passage: easy to clean, fast removal of banknotes and foreign objects.
7. AI artificial intelligence “neural network” algorithm recognition technology.
8. 5-inch high-definition touch display
9. Deep UVC sterilization (Intelligent control sterilization)

Specifications:

Counting Speed:  $\geq 1000$  pcs/min

Sorting Speed:  $\geq 800$  pcs/min; speed

modes: High/Medium/Low

Pocket Qty: 1 Hopper; 2 Stackers; 1 1 Reject pocket

Bill Capacity: Hopper 500 pcs/ Stacker 200 pcs/Reject  
100 pcs

Working mode: sorting mode, oriented mode, counting  
mode , set their own mode according to their usage  
habits and configure different sorting modes and  
sensitivities

Device Size: 314\*348\*460mm

Packing Size: 455\*425\*513mm

Device/Carton Weight: 20.4 kgs /22.6kgs

Power supply: 110-240( $1 \pm 10\%$ )V, 50( $1 \pm 5\%$ )Hz

Software Upgrade: PC Terminal/ U disk

Interface: RS232, USB, LAN, 2 display USB  
interface, U-disk

Optional Accessories: External display/UVC light  
tube/External thermal printer
